# RECYCLING INFORMATION 2023

## WHAT IS SINGLE STREAM RECYCLING?

Single stream recycling allows both residential and commercial recyclers to place all recyclables into one bin, regardless of material type. This makes recycling easier for the consumer and increases participation through the community.

## HOW IS SINGLE STREAM WASTE SORTED?

Tennis Recycling, L.L.C. sorts single stream waste using its state-of-the-art separating system. It is designed and built around the unique needs and requirements of the community and specific materials it recycles. This system processes and separates all recyclables into reusable end products.

## HOW DOES IT WORK?

Once collected, materials are delivered to our Recycling Facility located in St. Paul Park, MN to be processed in our single stream recycling facility.
